

Gen AI Exchange Hackathon

Team Name : **Team Victor**

Team Leader Name : **Abdullah Ansari**

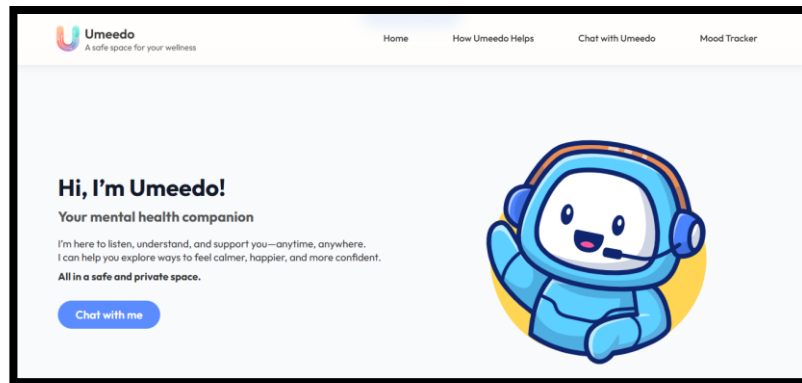

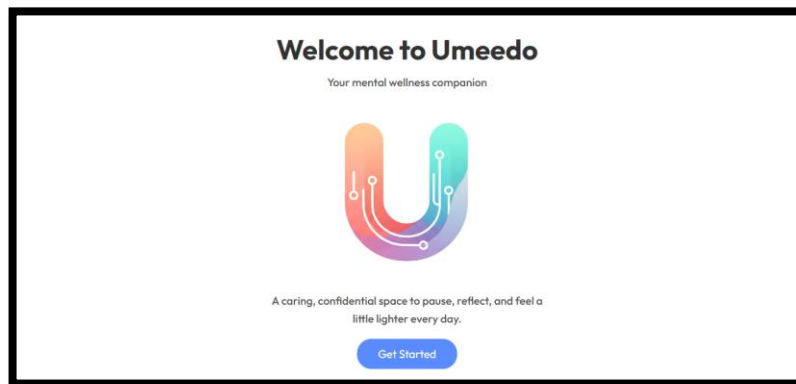

Problem Statement : **Generative AI for Youth Mental Wellness** - Design an AI-powered, confidential, and empathetic mental wellness solution that supports and guides youth in overcoming stigma and accessing help.

Brief about the prototype:

Umeedo is a safe, private, and holistic platform designed to support youth mental health anytime, anywhere. It offers:

- **Mood Compass** – Log and track your feelings in seconds.
- **Calm Minutes** – Quick exercises to relax and reset.
- **Professional Help** – Connect instantly with licensed therapists.
- **Mind Gym** – Fun mental exercises to boost focus, reduce stress, and improve mood.
- **Stress Escape Mini-Games** – Short interactive games designed to calm your mind and reduce stress instantly
- **Motivation Cards** – Quick inspiring messages to lift your mood.

Umeedo combines AI-driven conversation, interactive tools, and professional guidance in a single platform, empowering youth to improve emotional wellbeing in an engaging and accessible way.

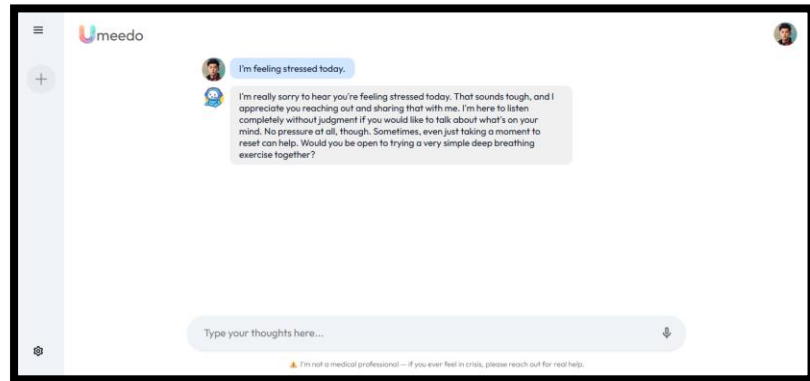

- **How is it different from other existing solutions ?**

Most apps focus on just one feature like chat, journaling, or meditation.

Umeedo is a **holistic platform** combining:

- Empathetic AI conversation
- Mood Compass tracking
- CBT self-assessments (PHQ-9, GAD-7)
- Guided exercises and gamified tools (Mind Gym, Stress Escape mini-games)
- Motivation Cards
- Direct access to licensed therapists

Multilingual support and a **user-friendly interface** ensure privacy, accessibility and engagement for youth.

- **How will it solve the problem?**

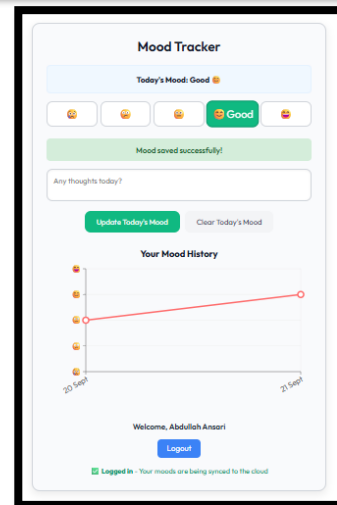

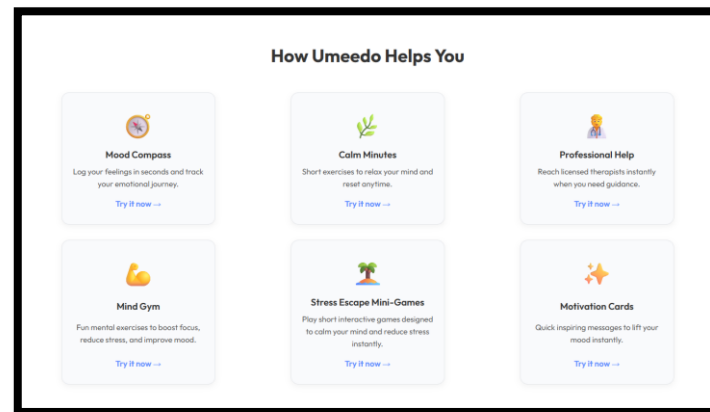

- Provides real-time emotional support whenever users feel stressed or anxious.
- Guides self-reflection through mood tracking and CBT-based assessments.
- Reduces stress and boosts focus with interactive exercises, mini-games, and quick motivational content.
- Offers direct professional help when needed, bridging self-care and therapy.

- **USP of the proposed solution**

The **only youth-focused platform** that combines empathetic AI chat, CBT self-assessments, gamified wellness tools, motivational content, and professional therapist access. Designed to be **safe, private, multilingual, and highly user-friendly**, ensuring support is both approachable and effective.

Umeedo offers powerful features designed to support youth mental well-being.

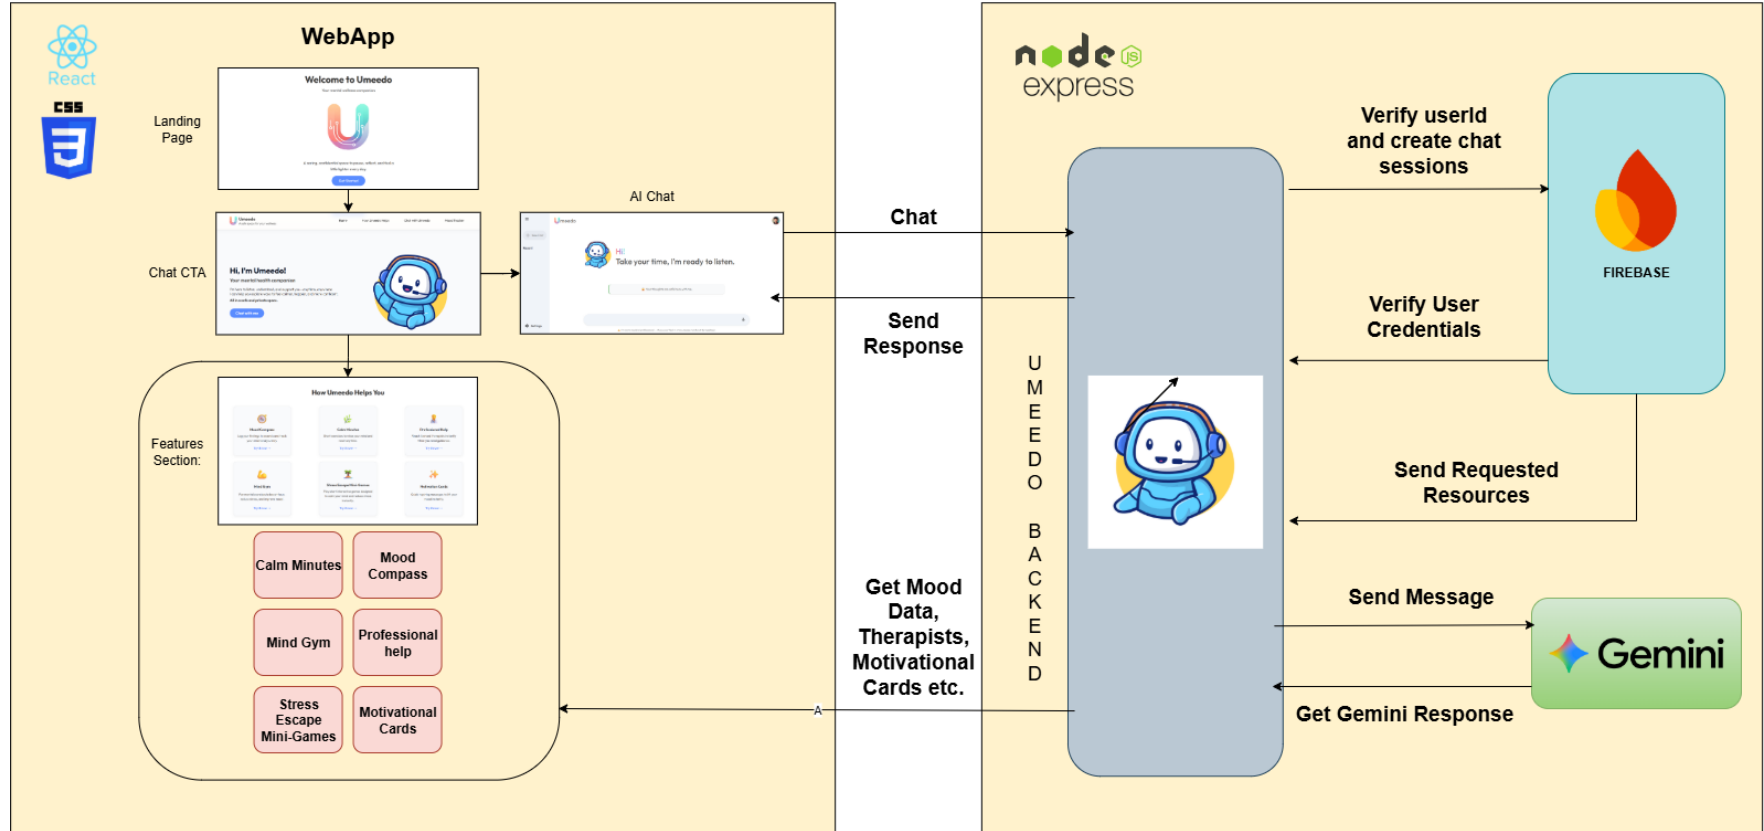

Feature	Description
Mood Compass (with CBT Self-Assessment)	Track and log feelings while reflecting on mood and thought patterns through short CBT-based quizzes
CBT Self-Assessments	Short quizzes to understand mood and thought patterns
Calm Minutes	Quick guided relaxation exercises
Mind Gym	Fun exercises to boost focus and mood
Stress Escape Mini-Games	Interactive games to reduce stress
Motivation Cards	Inspiring messages to lift your mood
Professional Help	Connect instantly with licensed therapists

Architecture: -

Umeedo Frontend

Umeedo Backend

Technologies to be used in the solution:

Technology	Type	Purpose / Usage
React	Frontend	Build interactive, responsive user interface for the web app.
React Router DOM	Frontend	Handle client-side routing between pages (Landing, Chat, Mood Tracker).
Recharts	Frontend	Display charts for mood tracking and visualizations.
Lottie React	Frontend	Render animated illustrations (e.g., waving bot).
CSS / Responsive Design	Frontend	Style components and ensure app works on all screen sizes.
Vite	Frontend	Build tool and development server for faster development and bundling.
Node.js	Backend	Server-side runtime environment to run JavaScript backend code.
Express.js	Backend	Web framework to create API endpoints and handle HTTP requests.
CORS	Backend	Enable secure cross-origin requests between frontend and backend.
Google GenAI (Gemini API)	Backend	Power the AI chatbot for confidential and empathetic mental wellness support.
Firebase Auth	Database / Cloud	Manage user authentication securely.
Firebase Firestore / Storage	Database / Cloud	Store mood entries, chat history, and other app data.
Google Cloud AI	Cloud / AI	Support AI features like conversational guidance and wellness tips.

Add as per the requirements for the hackathon:

Solution Overview:

- A confidential mental wellness platform for youth in India.
- Provides a Mood Tracker and empathetic chat guidance to support emotional well-being.
- Offers safe, non-judgmental access to mental health resources and guidance.
- Designed to reduce stigma and make mental health support more approachable and accessible.
- Future features include mini wellness exercises, interactive games, and motivation tools.
